Drawings

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the current drawings have blurred lines and hand-drawn numerals. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

2. The disclosure is objected to because of the following informalities: on page 1, second paragraph, line 5, it appears "moveable" should be "movably".

Appropriate correction is required.

Claim Objections

3. Claims 17-32 are objected to because of the following informalities: in claim 17, line 18, it appears that "form of rotatable" should be "form a rotatable". Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 17-32 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 43 28 742 to Walter.

Walter shows a metering cylinder/chamber at 6; valve cylinder 3; metering piston 5; mouthpiece 7; opening 13; valve piston 1; support plate 17; multiple channels 9, 10; and the remaining claimed structures are seen in Figures 1-5.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Voskuil et al., Hillis, Bonnigie, Thomas, Poitras and Lingenhoff show other metering devices.
